If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

Prior art documents discussed:

Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

it was proposed to amend independent claim 33 to include: i) the specific electrolyte material, ii) the particular constitution of the alloy of the anode, iii) a particle size better reflective of the examples and characteristics shown in Table 1 with respect to the Ni-Cu alloy, and iv) to clearly recite that the ceramic material particles are directly exposed to the fuel, making it clear that the ceramic material is in direct contact with the fuel (i.e. not encapsulated or covered), thereby forming a three-phase boundary as instantly claimed. The proposed amendment introduces subject matter to more adequately define the chemical nature of the electrolyte and the anode composition, the alloy particle size, and the triple phase boundary formed between all the claimed anode materials and the fuel. Applicant gave authorization to make an Examiner's amendment incorporating the above-discussed limitations.

Part III.

☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.

☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.
